

User Manual-Rental Shop

This document tries to present all the options that you have in the Rental shop app

First you have the login page(where you will be redirected if you try to enter any other endpoints):

The screenshot shows a web browser window with the address bar displaying 'localhost:4200/login'. The page title is 'Rental Shop'. The main content area is titled 'Login' and contains two input fields: 'Username' with the value 'Dizzy' and 'Password' with masked characters '••••••'. Below the password field is a 'Login' button.

Here you can enter an user, we have two kinds of users: Shopkeeper and Client After you enter a valid user you can press login.

Next you will be presented with some options depending on your role.

Shopkeeper options:

Rental Shop

Rental Shop

Clients

Movies

Rentals

Logout

Client options:

Rental Shop

Rental Shop

Clients

Movies

Logout

Client Menu showing the list of options, you can add, delete (by pressing the delete button on any of the entities), update, filter and sort them (paginated or not):

Rental Shop

Add New Client
Filter Clients
Sort Clients
PaginatedFeatures
Go Back

Clients

1. 4
2. 78
3. 888
4. 555

If you select any client you get this:

888 was selected

If you click on the View Details button you can modify from here any of the client field except for the id and save it or go back without saving:

Client 888 details

Client first name: lonel

Client last name: lonel

Age: 123

Clicking on the Add New Client button you will get rerouted to this page:

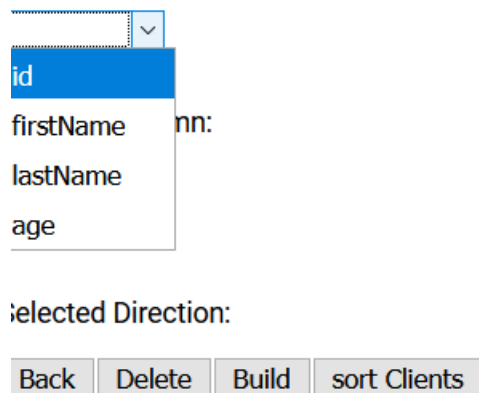

First Name
last Name
Age

If you press the Filter Clients button you will get to this page where you can filter by different criterias:

Name:
Age:
FirstName:

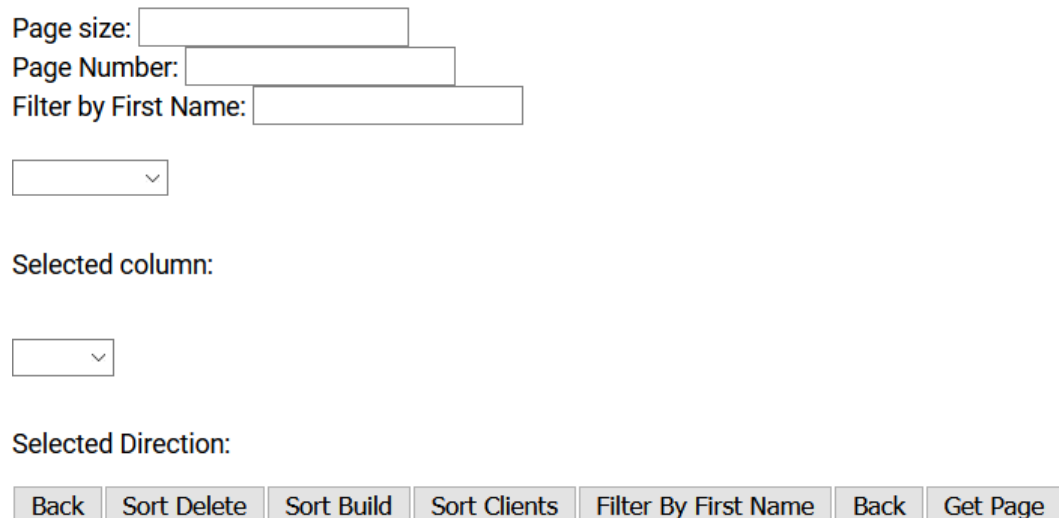

Clients

If you press the Sort Clients button you will get to this page where you can build a sort by selecting different columns with a direction (Asc or Desc) and clicking on build, when you are finished building the sort you can do a sort Clients, or if you are not satisfied with you sort criteria(s) you can just delete the sort and create a new one:

The screenshot shows a web interface for sorting clients. At the top, there is a dropdown menu with a blue highlight on the 'id' option. Below the dropdown, the text 'Selected Direction:' is visible. At the bottom, there are four buttons: 'Back', 'Delete', 'Build', and 'sort Clients'.

If you want to do a paginated filter or sort you can do it by simply pressing the PaginatedFeatures button:

The screenshot shows a web interface for paginated features. It includes three input fields: 'Page size:', 'Page Number:', and 'Filter by First Name:'. Below these fields is a dropdown menu. Further down, the text 'Selected column:' is followed by another dropdown menu. Below that, the text 'Selected Direction:' is followed by a third dropdown menu. At the bottom, there are seven buttons: 'Back', 'Sort Delete', 'Sort Build', 'Sort Clients', 'Filter By First Name', 'Back', and 'Get Page'.

The same menu applies for the Movies menu.

The Rentals menu allows only for CRUD operations to be done, since both menus look the same with the client menu I decided to not add pictures for those menus.
